PREFACE.

This Register contains the names of all persons who have been enrolled for at least one term as students in any of the courses of instruction in the School of Industrial Science or in the School of Mechanic Arts of the Massachusetts Institute of Technology, and whose connection with the Institute as undergraduates terminated before October 1, 1911. In general, however, the names of students who entered with classes that graduate after 1911 are not included, even when such students are not at present attending the Institute. The annual Register of Graduates hitherto issued will probably be discontinued, and it is expected that revised editions of this Register will be published from time to time, perhaps at intervals of five years.

The addresses and occupations have been corrected in accordance with information furnished prior to April, 1912. The omission of an address indicates either that none has been supplied or that letters mailed to the last known address have been returned as unclaimed. Information regarding incorrect or missing addresses and occupations is earnestly desired by the Registrar.

In the Alphabetical Register the Roman numerals and year following a name indicate the Department and year in which the student received the degree of S.B., Bachelor of Science, *viz.*:—

I. Civil Engineering.
II. Mechanical Engineering.
III. Mining Engineering and Metallurgy.
IV. Architecture.
V. Chemistry.
VI. Electrical Engineering.
VII. Biology and Public Health.
VIII. Physics.
IX. General Studies.
X. Chemical Engineering.
XI. Sanitary Engineering.
XII. Geology.
XIII. Naval Architecture and Marine Engineering.
XIV. Electro-chemistry.
S. & L. Science and Literature.
Phil. Philosophy.
Elect. Elective.

If a graduate has received only an advanced degree from the Institute, this degree, together with the year in which it was conferred, is indicated. In case a graduate has received not only the Bachelor's degree but also advanced degrees from the Institute, these are recorded in the order in which they were granted. Graduates of the Course for Naval Constructors are designated by the symbol XIII A. In the case of special students the years of attendance are shown and also so far as is practicable the Course pursued. Degrees received from other institutions are placed immediately after the name.

Graduates and special students of the School of Mechanic Arts of the Institute are indicated in a manner corresponding with the rest of the general scheme.

Parentheses, used in connection with the names, indicate, so far as is known, the usual form of signature.

The Geographical Register is intended to serve merely as an index. For more detailed information in regard to any individual, reference may be made to the Alphabetical Register.

Particular attention is called to the various Alumni Associations, membership in which is open to all former students of the Institute, whether graduates or not. It is earnestly hoped that these organizations will constantly increase in number and influence. All persons who have been connected with the Institute are urged to identify themselves with one or more of these associations.

The editors desire to express their appreciation of the great interest shown by the Alumni in this Register and to thank all those who have rendered assistance by supplying information that otherwise would not have been obtainable.

The Association holds informal gatherings at various clubs (including at least one outdoor Summer meeting) during the year, and the annual dinner occurs towards the end of February or early in March. The annual meeting is held in June or July at the regular outdoor meeting, and officers are elected at this time.
